

# How to change your interface language

This documentation, including images, videos and text, is accurate as of Version 5.12 of Pascal.

We strive to keep our documentation up to date with each release to ensure it remains a reliable resource for our users. However, given the dynamic nature of our software development, there might be instances where changes introduced in subsequent versions are not immediately reflected in this documentation. We encourage users to refer to [the latest release notes](#) and to use the feedback mechanism for any discrepancies or requests for clarification.

To change you interface settings, follow the below steps:

- 1 Click on your initials in the top right corner.
- 2 Open the Account settings.
- 3 Navigate to the Languages tab.

The default of the interface of Pascal is English (UK). This can be changed by selecting a different language in the dropdown menu that contains all the languages we currently provide. Pascal will automatically and immediately change its interface to the language that is chosen.
