

# Multiple Pascal environments

This documentation, including images, videos and text, is accurate as of Version 5.12 of Pascal.

We strive to keep our documentation up to date with each release to ensure it remains a reliable resource for our users. However, given the dynamic nature of our software development, there might be instances where changes introduced in subsequent versions are not immediately reflected in this documentation. We encourage users to refer to [the latest release notes](#) and to use the feedback mechanism for any discrepancies or requests for clarification.

If your email address is used for multiple accounts across several Pascal environments (called organisations in the application), you will have an option in the menu below your initials to change to the other environment. When selecting the other environment there, you will be taken to the other environment immediately. The environment you are active in, will be displayed in the top right corner, besides your initials.

The screenshot displays the Pascal application interface. At the top, there is a navigation menu with items: Screening, Home, Clients, Cases, and Statistics. The user is logged in as Jane Doe, and the current environment is 'Demo environment'. The main content area shows a greeting 'Hi Jane Doe.' and a notification 'You have 27 notifications waiting for you and you have 0 active cases.' Below this, there are buttons for 'New client +' and 'New case +'. A 'Monitoring' section indicates 'All notifications are resolved'. A 'Statistics' section shows three circular gauges for 'Unresolved cases' (0), 'Partially resolved cases' (0), and 'Resolved cases' (0). A 'Your recent cases' section shows 'No recent cases' and a 'Show all cases' button. A dropdown menu is open, showing options for 'Demo environment', 'Second demo environment', 'Account settings', 'Need help?', and 'Sign out'.

The personal settings you have set up in the Configuration and Languages tabs in your Account settings are the same for your account in all organisations.
