

How to upgrade your organisation to paid

This documentation, including images, videos and text, is accurate as of Version 5.12 of Pascal.

We strive to keep our documentation up to date with each release to ensure it remains a reliable resource for our users. However, given the dynamic nature of our software development, there might be instances where changes introduced in subsequent versions are not immediately reflected in this documentation. We encourage users to refer to [the latest release notes](#) and to use the feedback mechanism for any discrepancies or requests for clarification.

For environments originating from the Microsoft Azure Marketplace, upgrading your plan is possible from the Microsoft Azure SaaS subscription page.

In the Billing details page in the Billing section of Pascal's Settings, some information about your free account can be found. The Current usage card shows how many searches are still left to perform in the current month and the Reset search usage shows the date when the searches that can be performed will be renewed to 50.

On the left, there is an option to upgrade your Pascal account with the Upgrade now button. This enables you to perform more searches than only 50 per month, which gives you access to more monitoring capabilities and more new screening room.

How to upgrade

Upgrading your account to a Pay as you Go account has great benefits such as more monitoring capabilities, access to more searches which enables you to have more datasets enabled or creating more cases. Before you can use Pascal unlimited, your organisation needs to be upgraded to a paid version.

You can start the upgrade procedure in the Billing details page in the Billing section of your Settings with using the Upgrade now button or via the Upgrade now option in the blue banner at the top of the page. All the settings that are saved in the upgrading process will be available next time you come back, but will not be enabled until you go through the upgrade flow fully.

- 1 Select the Upgrade now button.**
- 2 Fill in the Organisation details page and select Continue.**
- 3 Add your preferred Payment method by selecting the Add button for the presented method of your choice.**
- 4 Review the order summary shown in the final page, accept the terms and conditions and click on Confirm order.**
- 5 Select the Confirm button in the next popup.**

Now your account is converted to the paid version of Pascal. If you'd like to change the datasets enabled in your environment, you can do this after upgrading by choosing the Edit plan button in the My plan card.
