How to edit case specifications

This documentation, including images, videos and text, is accurate as of Version 5.12 of Pascal.

We strive to keep our documentation up to date with each release to ensure it remains a reliable resource for our users. However, given the dynamic nature of our software development, there might be instances where changes introduced in subsequent versions are not immediately reflected in this documentation. We encourage users to refer to the latest release notes and to use the feedback mechanism for any discrepancies or requests for clarification.

It may be necessary to edit the case specifications if an error has been made in the original entry or if more information on a client has come to light.

1. **Open the case of interest.**
2. **Select Edit in the Specifications card.**
3. **Edit the information fields of the case.**
4. **Select the Save button.**

The updated information will be used to perform a new search. All hits that are still unresolved will be updated. Hits which have already been resolved will not change.

> *The case name can only be updated once per day.*
