

# Pascal Update Emails

**This documentation, including images, videos and text, is accurate as of Version 5.12 of Pascal.**

**We strive to keep our documentation up to date with each release to ensure it remains a reliable resource for our users. However, given the dynamic nature of our software development, there might be instances where changes introduced in subsequent versions are not immediately reflected in this documentation. We encourage users to refer to [the latest release notes](#) and to use the feedback mechanism for any discrepancies or requests for clarification.**

**When Pascal is updated to a newer version, an email is sent to users which have this option enabled in their Configuration Settings.**

**This email informs you on the new update. Two buttons are included to take you to the product documentation for more information about the update:**

- **The Changelog of a specific update contains all additions, changes and fixes that were made in the update.**
- **The What's new articles of a specific update contain a brief explanation about the highlighted features.**

## Discover the newest features available on Pascal 5.12.0

---

Dear John Doe,

We are pleased to inform you that Pascal has been upgraded to version 5.12.0. You may explore the new functionalities included in this update directly within Pascal or consult our changelog to review a comprehensive list of modifications. Additionally, the What's New section highlights certain features to provide a more detailed overview of the improvements.

[Changelog](#)

[What's New](#)

If you wish to stop receiving these emails, please access the [Configuration](#) page in Pascal and modify the "Receive Pascal update notifications via email" setting accordingly.

Should you have any queries or concerns regarding this correspondence, please do not hesitate to contact us at [pascal.support@vartion.com](mailto:pascal.support@vartion.com).

Sincerely,  
Vartion
