

# How to create groups in Pascal

This documentation, including images, videos and text, is accurate as of Version 5.12 of Pascal.

We strive to keep our documentation up to date with each release to ensure it remains a reliable resource for our users. However, given the dynamic nature of our software development, there might be instances where changes introduced in subsequent versions are not immediately reflected in this documentation. We encourage users to refer to [the latest release notes](#) and to use the feedback mechanism for any discrepancies or requests for clarification.

An organisation owner or admin can create groups in the Pascal environment with the following steps:

- 1 Click on your initials in the top right corner.
- 2 Select Settings next to the environment name.
- 3 Navigate to the Groups page in the Organisation section.
- 4 Click on the Add Group button.
- 5 Fill in the group name and add the users to the group.
- 6 Select the Apply button.

A new group has now been created.
