5.16 version 2024/07/20

Pascal Screening:

Added:

- **Added support for webhooks to enable receiving information when cases are done searching, when new hits are found during monitoring and when a case is fully resolved.**

Changed:

- **Changed the Case import to be able to search existing cases if an existing case is mentioned in the import file.**
- **Changed the searching of cases to be more efficient and streamlined between different requests.**
- **Changed the notification when importing cases is finished to be more descriptive.**

Fixed:

- **Resolved an issue where American English spelling was shown instead of British English.**
- **Resolved an issue where creating cases from HubSpot with one letter was possible.**
- **Resolved an issue where the assignee field was visible in the Edit case dialog.**
- **Resolved an issue where the date range filter wasn't working when another date format than the default was chosen and the Interface language was set to Dutch.**
- **Resolved an issue where the quick clear button was not visible in the risk filter option on the Cases page.**
- **Resolved an issue where excluded terms added to a case were cleared when the case details were updated.**
- **Resolved an issue where the alignment of the sign up page at the bottom was incorrect.**
- **Resolved an issue where the pluralisation was incorrect when selecting multiple cases on the Cases page.**

- **Resolved an issue where the Not available tag for Risk wasn't aligned correctly in Preview cases.**
- **Resolved an issue where the custom selected date format wasn't used in case reports.**
- **Resolved an issue where removing an added SEPA Direct Debit card during account creation was not possible.**
- **Resolved an issue where removing the Owner role from a user was not possible with using the cross next to the role.**
- **Resolved an issue where it was possible to add an empty alias when creating a case.**
- **Resolved an issue where inviting the same user twice was possible.**

Pascal Onboarding:

Added:

- **Added the option to use true/false questions in Person Entity questions.**
- **Added the option to change the assigned user to a form.**
- **Added the audit message of when a client is created.**
- **Added the audit message of when a form is created.**
- **Added an email and visual feedback of when the client is approved.**
- **Added a button in the form to move to the next section.**

Changed:

- **Changed the position of the delete button in a client.**
- **Changed the sections in a form to stay in the screen when scrolling down in a form.**

Fixed:

- **Resolved an issue where the texting when only one question is left to be answered was incorrect.**
- **Resolved an issue where all comments made on a sub question in a form, were saved for all sub questions.**
