

4.14 Update case status in bulk

From the release of 4.14.0 cases status can now also be updated in bulk, similar to assignee. In the Cases page the option to select all cases now works for case status. When certain cases are selected the status can be also be changed. This way you do not need to go to each individual case to change the status of a multiple cases.

The screenshot displays the 'Cases' page of a web application. The top navigation bar includes 'Dashboard', 'Clients', and 'Cases' (active). On the right, there are links for 'Statistics', 'Data Directory', 'Settings', and a user profile 'JD'. The main content area is titled 'Cases' with a 'New case +' button and an 'Edit' button. Below the title, there are several filter sections: 'Status' with checkboxes for 'In review', 'Monitored', and 'Archived'; 'Assign filters' with 'Assigned cases' and 'Collaborated cases' buttons; and 'Hit filters' with 'Unresolved cases', 'Cases with updated hits', 'Cases with resolved hits', and a 'Date of creation' dropdown. A 'Reset filters' link and an 'Export cases' link are also present. Below the filters is a table with columns: 'Name', 'Clients', 'Status', 'Risk', 'Assignee', and 'Last modified'. The table contains one row for 'John Doe' with a 'Pending search' status and an assignee of 'John Doe'. At the bottom of the page, a summary bar shows 'All 1 cases selected' and buttons for 'Assign', 'Update status', 'Delete', and 'Cancel'.

Name	Clients	Status	Risk	Assignee	Last modified
<input checked="" type="checkbox"/> John Doe		Pending search		John Doe	2 months ago
