

4.14 Update case status in bulk

From the release of 4.14.0 cases status can now also be updated in bulk, similar to assignee. In the Cases page the option to select all cases now works for case status. When certain cases are selected the status can be also be changed. This way you do not need to go to each individual case to change the status of a multiple cases.

The screenshot shows the 'Cases' page in a software application. The page has a navigation bar with 'Dashboard', 'Clients', and 'Cases' (selected). There are also links for 'Statistics', 'Data Directory', 'Settings', and a user profile 'JD'. The main content area is titled 'Cases' and includes a 'New case +' button and an 'Edit Filter' button. Below this are several filter sections: 'Status' with checkboxes for 'In review', 'Monitored', and 'Archived'; 'Assign filters' with 'Assigned cases' and 'Collaborated cases' buttons; and 'Hit filters' with 'Unresolved cases', 'Cases with updated hits', 'Cases with resolved hits', and a 'Date of creation' field. A table below the filters shows one case: 'John Doe' with status 'Pending search', assigned to 'John Doe', and last modified '2 months ago'. At the bottom of the page, a summary bar indicates 'All 1 cases selected' and provides buttons for 'Assign', 'Update status', 'Delete', and 'Cancel'.
