

# 4.17 Media age filter

If you would like to only check recent media articles in case searches, a setting is now added to Pascal to set a time range you would like to search in media for possible hits on your cases.

How to change this setting:

- 1 Go to the Settings page
- 2 Select the Policies tab
- 3 Scroll down to the Filtering section in the page
- 4 At the bottom of this section, the dropdown Media age filter can be used to only search on recent media articles. The filter has the options from: only consider the last year to only consider the last 10 years and every year in between.
- 5 After changing this setting, select the Save button to save the changes you have made.

The screenshot shows the 'Filtering' section of the Pascal Settings page. It includes sliders for 'Confidence threshold: 10', 'Sanctions: 10', 'Business Sources: 90', 'Enforcements: 10', 'Media Sources: 20', 'PEPs: 10', and 'Other Sources: 10'. There is a toggle for 'Advanced confidence' and a 'Media Sources filters' section with a 'Media property filters' dropdown. The 'Media age filter' dropdown is open, showing options from 'Only consider the last 1 year' to 'Only consider the last 10 years'. The 'Only consider the last 1 year' option is selected. Below the 'Filtering' section is a 'General' section with a toggle for 'Require multi-factor authentication via email'. At the bottom are 'Save' and 'Reset all policies' buttons.
