

5.4 Commenting on hits

In this update, we have added a commenting system to collaborate with colleagues on resolving cases. In the resolving panel, you can now see a new column named **Comments**. Here you can quickly add a comment to a hit, and view comments which are already made by you or others.

The comments column can be filtered on, to show the hits with the most comments first. The search bar can be used as well to search for texts in comments.
