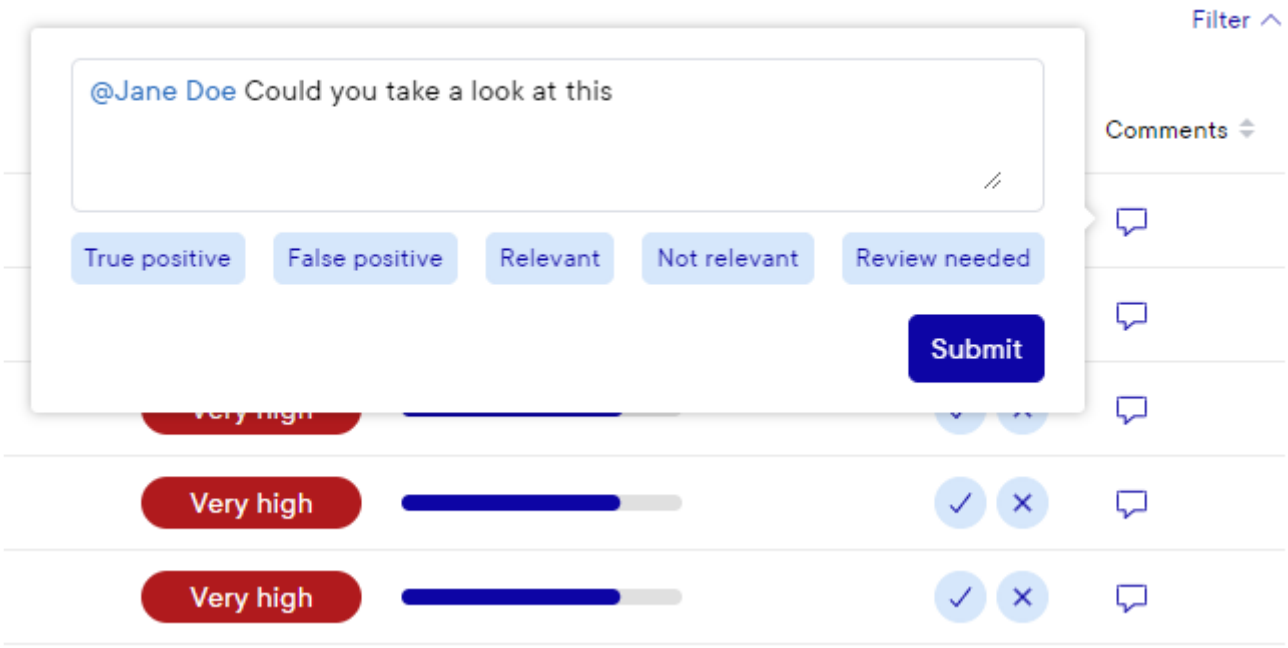
5.8 Mentions in comments

In this update, we introduce the option to mention someone in hit comments. You can mention someone by typing '@name' in the comment. The person you mentioned will receive a notification about your made comment and can quickly navigate to that comment via the notification.



The person mentioned in the comment will then receive a notification about the comment. The notification can be found in the Messages section. When clicking on the Read button, they will be taken to the comment in the specified case.
