

6.0 Monitoring frequencies

We have added more flexibility to the way you can monitor for new results in Pascal. From the Pascal 6.0 update, you can change monitoring frequencies per source. This can be changed as a default setting, but can also be changed in an individual case as well.

To change your monitoring frequency within your Pascal environment navigate to the **Screening Settings** and update the Monitoring frequency in the **Policies** page. After changes have been made, save the changes by pressing the **Save** button.

The screenshot shows the 'Policies' page in the Pascal environment. The page has a top navigation bar with 'Example Organisation', 'Organisation', 'Screening', 'Billing', and 'Data Directory'. The 'Screening' tab is active. Below the navigation bar, there are tabs for 'Policies', 'Case workflow', and 'Import cases'. The 'Policies' tab is selected, showing the 'Full cases' section. The 'Full cases' section has a title 'Full cases' and a subtitle 'Full cases require resolving of hits. Often used for onboarding actual clients to your organisation.' There are two buttons: 'Reset to defaults' and 'Save'. Below this is a table with columns: 'Sources', 'Name', 'Default', 'Confidence', and 'Monitoring frequency'. The table has five rows: 'Sanctions', 'Enforcements', 'PEPs', 'Media', and 'Other'. Each row has a 'Default' column with a checkmark, a 'Confidence' column with a slider and a value (55, 55, 55, 65, 55), and a 'Monitoring frequency' column with a dropdown menu. Below the table, there are 'Media filters' with two dropdown menus: 'Show adverse & negative events' and 'Only consider the last 5 years'.

Sources	Name	Default	Confidence	Monitoring frequency
	Sanctions	<input checked="" type="checkbox"/>	<div><div></div></div> 55	Daily
	Enforcements	<input checked="" type="checkbox"/>	<div><div></div></div> 55	Daily
	PEPs	<input checked="" type="checkbox"/>	<div><div></div></div> 55	Weekly
	Media	<input checked="" type="checkbox"/>	<div><div></div></div> 65	Monthly
	Other	<input checked="" type="checkbox"/>	<div><div></div></div> 55	Monthly

Media filters

Show adverse & negative events

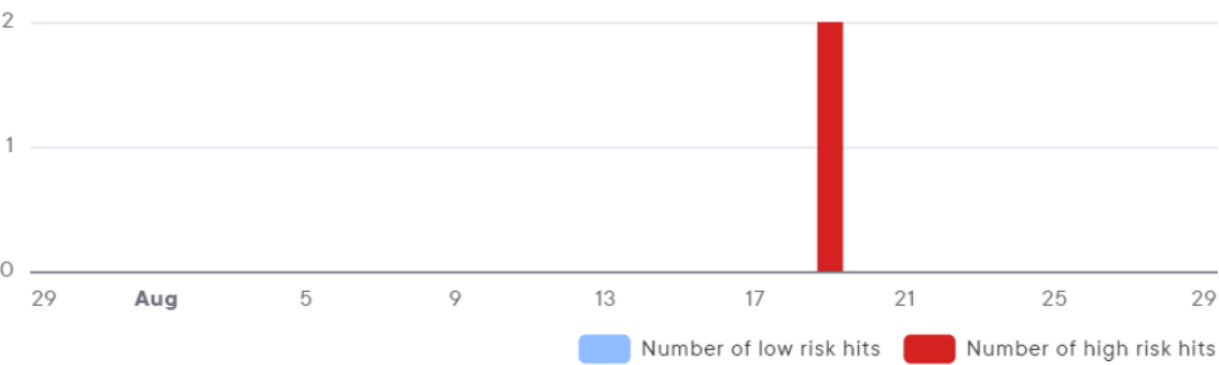

Only consider the last 5 years

Within the case overview page of a case with the status monitored. The monitoring frequency can be changed for only this case. To do this, open the case you would like to change the frequency for. Within the Monitoring section, select the **Edit frequency** button. Here, you can update the default frequency to the frequency you want to use for this specific case.
