

# 6.5 Introduction of Grouping Clients

In Pascal 6.5, we introduce the ability to group clients, offering flexibility in organising your client and third-party relationships. This new feature allows you to better structure client data to align with your way of working.

## How It Works

- 1 Adding Linked Clients:**  
Navigate to the Linked Clients section within a client profile and click Add Client. Select the clients you want to include in this group.
- 2 Linking Cases:**  
You can also link cases to the same client profile in a similar way.

## How It's Beneficial

- **Flexible Structures:** Organise client data in layers that mirror your preferred way of working.
- **Custom Relations:** Create intricate client and case relationships without restrictions.
- **Improved Transparency:** Improve visibility across your organisation.
